Examiner's Detailed Office Action

1. This Office Action is responsive to communication received on December 01, 2005.
Amendment under 37 CFR § 1.111 reconsideration and allowance of application is respectfully requested by applicant.
2. Applicant's has elected not to amend the claims. Moreover, arguments have been fully considered, however, they are not persuasive. The 35 USC § 102(e) & 35 USC § 102(a) rejection stands. The complete text of which has been included below.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

4. The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an

Art Unit: 2121

international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

5. Claims 1, 4-7, 10-12, 14 & 15 are rejected under 35 U.S.C. 102(e) as being anticipated by *Straforini et al.* (USPN 6,092,059).

Regarding claims 1, 4-7, 10-12, 14 & 15. *Straforini et al.* teaches generating classification outputs from a first data classifier based on first data elements, using the classification outputs and the first data elements to generate rules relating the first data elements and the classification outputs, a first data classifier configured to generate, based on first data elements, classification outputs, and a rule inducer configured to use the first data elements and the classification outputs to generate rules relating the first data elements and the classification outputs, generating classification outputs based on first data elements provided to a first data classifier, and generate rules relating the first data elements and the classification outputs, based on the first data elements and the classification outputs [see Abstract, C 3, L 47 to C 4, L 17, C 17, L 23-35, Fig. 3, C 10, L 49 to C 11, L 43].

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2121

7. Claims 2, 3, 8, 9 & 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over *Straforini et al.* (USPN 6,092,059) in view of *Rangachar* (USPN 5,495,521).

Straforini et al. has been discussed above and does not explicitly describe the limitations of claims 2, 3, 8, 9 & 13. However, *Rangachar* describe the limitations of claims 2, 3, 8, 9 & 13.

Regarding claims 2, 3, 8, 9 & 13. the first data elements include data based on usage of a telecommunications network and the data include call detail records [see Abstract]. It would have been obvious at the time the invention was made to a persons having ordinary skill in the art to combine *Straforini et al.* with *Rangachar* because fraudulent telephone calls are a major source of revenue loss to telephone service providers [see C 1, L 24-25].

Response to Arguments

8. Examiner has reviewed and taken into considerations applicant's arguments. Applicant has present ed a broad set of claims, such that examiner contends the art of record reads on i.e., a first data classifier based on a first data elements etc. [see Abstract & FIG. 3, C3L 47 to C4, L 17].

Examiners Summary

9. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

10. A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 2121

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
